# Average Daily Membership Numbers in SB 800 Indicate Higher Than Anticipated Enrollment, but Projected Enrollment Trends Show Decline Through Fall 2030

**K-12 enrollment drives underlying calculations of funding. Enrollments are projected to decline by 2.9% through fall 2030.**

- Some students who left public schools during the pandemic may continue to return, which can impact projected enrollments.
- The updated average daily membership (ADM) projections in the introduced budget indicate that enrollment may be higher than estimates used in Chapter 2 (+2,100 students in FY 2025 and +3,900 students in FY 2026).
